

Ontide Upper Management Responsibility (C-TPAT)

As part of the global supply chain, Ontide's top management is fully aware of the significance of the CTPAT protocol and its requirements. Therefore, Ontide is committed to upholding the standards and requirements outlined in the CTPAT manual and guidelines. This ensures that not only its onsite operations but also its entire global logistics and transportation processes are fully aligned with the comprehensive sections of the CTPAT protocol.

Under no circumstances will Ontide's management and staff compromise the integrity of security across its entire global supply chain. They are committed to protecting it from criminal activities such as terrorist attacks, organized theft, human trafficking, or any other illegal activity that violates the CTPAT protocol. Upon detecting such activities, Ontide will immediately intervene to eliminate both potential and actual security threats arising from these illegal actions.
